### Training Key

Easy- Run easy to aid bodies recovery

Thresh- Run at a steady fast pace, (3 thresh means run 3 mile at threshold pace)

Fartlek- (Swedish for “speed play”) is simply sprinting and jogging off and on during a run. For example, a normal fartlek workout is a 40-60 minute training run. However, instead of keeping the same pace through the whole workout you sprint, then jog, then sprint again whenever you feel like it.

Hills- Hill repeats or Kenyan hills; Run fast up a hill (normally a hill with will take 90 seconds to get to the top, jog back down and repeat).

Practice- Run the distance at marathon pace i.e. practice running your marathon pace for 6 mile.

Please note; Threshold runs, Fartlek, Hills and Practice all require at least a 1 mile warm-up (before) run and a 1 mile cool down run (after).
